EMPLOYMENT OPPORTUNITY

JOB TITLE: SENIOR APPLICATION DEVELOPMENT ANALYST

LOCATION: SAN FRANCISCO, CA

JOB REQUISITION #: 2813

OVERVIEW

The Senior Application Development Analyst-Senior Engineer in the Information Services (IS) Division of the Administrative Office of the Courts (AOC) will be responsible for development activities surrounding the judicial branch's Computer Aided Facilities Management (CAFM) solution. The incumbent will work on projects and interact with both technical and business stakeholders on topics such as requirements definition, application configuration, custom development, report development and testing of application components. The successful candidate will develop reports, configure the CAFM application and solve problems working with various internal and external vendors and users.

RESPONSIBILITIES

- Work with vendors to develop required systems interfaces, objects, and reports, as requested.
- Develop custom objects as required.
- Use standard procedures and techniques to coordinate the creation and modification of programs and resolve more complex problems of design, development, implementation, and support.
- Monitor reports, applications and interfaces to ensure high performance.
- Research, recommend, and apply new technologies.
- Develop project timeline estimates.
- Work with project team to develop technical requirements documentation.
- Coordinate database design and creation of prototypes.
- Provide lead direction, training, and work review.
- Organize and assign work, set priorities, and follow up to ensure coordination and completion of assigned work.
- Work with vendors to resolve software problems.
- Provide on-going problem resolution application support.

QUALIFICATIONS

Education and Experience:

- Equivalent of a bachelor's degree, preferable with major course work in computer science and three years of experience in the analysis, design and development of applications software and other information systems, including one year of lead experience.

Additional experience may be substituted for the education on a year-for-year basis. Possession of a directly related postgraduate degree may be substituted for one year of experience.

OR

- One year as an Application Development Analyst with the judicial branch in Information Systems.

Knowledge of:

- Principles of information systems architecture for enterprise-wide systems deployment such as multi-tier, distributed and client/server system architecture and development principles, and internet/intranet application delivery mechanisms;
- Principles and techniques of program design, development, testing, and documentation;
- Principles and techniques of preparing effective oral presentations; and
- Principles and techniques of project management.

Ability to:

- Organize, prioritize, and coordinate multiple work activities and meet project deadlines;
- Plan, direct, and review the work of others on a project or day-to-day basis;
- Explain technical issues to business users, senior management in a non-technical manner;

Desirable characteristics:

- Extensive experience in:
 - JAVA/JSP
 - Crystal Reports
 - Report writing tools
 - XML
 - SQL
 - Experience with web based ERP systems
 - Being the lead engineer in developing and implementing a major packaged software application.
